## CHARDONNAY RESERVA 2007

### VITICULTURE

**Vineyard:** Sourced from two different contract growers in the upper Casablanca Valley. From vines with an average age of 14 to 16 years.

**Soil:** Free draining, alluvial loam/clay of medium fertility.

**Climate:** Yearly average rainfall of 450 mm, concentrated in the winter months. Summers are dry with warm days and cool nights. Temperatures are moderated by the presence of morning fogs and sea breezes from the Pacific Ocean.

**Vineyard Management:** Planting density of 3,500 vines/hectare, trained to vertical shoot positioned canopy and spur pruned. Canopy trimming was carried out once in early spring and again at the beginning summer. Leaf plucking was carried out by hand at the beginning of March in order to increase bunch exposure.

### WINEMAKING

**Grape variety:** Chardonnay 100%

**Harvest:** The fruit was picked by hand on the 17 - 18<sup>th</sup> of April 2007.

**Winemaking Techniques:** The grapes were crushed and destemmed to the press via a must-chiller. The must was then given 12 hours of skin contact (at 10-12°C) in order to extract the aromas and flavours contained in the skin. Following this the must was drained and cold settled for 2 days before being gravity fed to 33% new, 33% second use and 33% third use barrels. These were subsequently inoculated with several different selected yeasts. Fermentation took a total of 3-4 weeks with temperatures peaking at 20-22°C. The barrels were manually 'stirred' weekly following fermentation up until bottling after a total of 7 months in barrel.

**Oak:** 100% of the blend was aged for 7 months in 33% new and 67% second and third use French barrels.
